**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims	<u>1-13</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-13</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-13</u>	YES
	Claims		NO

**2. Citations and explanations (Rule 70.7)**

Document cited in the International Search Report:

D1: US 5677711

Document D1 is showing an electronic device with a front cover 15 and a back cover 16. The front cover has a digitizer 10 mounted therein.

Claim 1 differs from document D1 in that the front cover has a decoration thereon. However, a decoration is not considered as a technical feature, it is rather an artistic feature. The word "decoration" is therefore misleading. The "decoration" should in stead have been called "marked touch areas" or something like that. These marked touch areas differ from the digitizer of D1 and it is not considered obvious for a person skilled in the art to arrive at the invention with touch areas by knowing D1 with the digitizer.

Therefore, the invention according to claims 1-13 is new and considered to have inventive step and industrial applicability.

**Box No. VIII Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The word "decoration" is misleading. The intended feature seems to be better described by "marked touch areas".
